

## **\*Mañana / Mälar 25 for sale\*\* Year of construction: 1949 / Kungsörs Båtvärv AB / Sail number: S12**

Our Mälar 25 is for sale as we are upsizing. An extensive refit was carried out by the boatbuilder Hagen Benz in his boat workshop in Greifswald. Since its completion, Mañana's bilge has not even gotten damp when craned. In addition to some regatta successes, this seaworthy and stiff skerry cruiser has proven itself on longer Baltic Sea tours between Kattegat and the Stockholm Archipelago. Mañana can currently be trial-sailed in the Greifswald Bodden. Due to its excellent condition, maintenance is limited to sanding and varnishing the clear-coated surfaces, which can be accomplished by two people in three days. No restoration work is needed for the next decade.
